SECRET WRITING

For Secret Writing can be used :

First : A solution of nitrate of seda and starch in water x /may be carried for example in handkerchiefs or starched collars, starched shirts or anything else starched/ These things being laid in this solution and then ironed. The article thus treated is later on again put in water and a solution obtained which can be used for invisible writing. / The best means for devloping are iodite of potassium.

Second: Sulphate of iron, developed preferably with ferro cyanite of potassium.

Third: Nitrate of silver developed preferably with ~~xma~~ 2, or 4.

Fourth: Rice starch, developed with ink mixed with water.

Fifth: Lemon juice, developed with Ferro cyanite of potas

x A tumbler of water is boiled together with a table spoon of starch, allow to cool, and add ten gramms of nitrite of soda.

For developing secret writing is used:

1. Iodite of Potassium, /5 grams with 100 grams of water, 2 g of tartaric acid added/
2. Sulpharated soda.
3. Ferro cyanite of potassium.
4. Ink, mixed with water / laid on with a brush/
